STANDARD AND CONSTRUCTION

ROLLING HINGES

In the same color as the door structure, enhancing the visual appearance of the door.

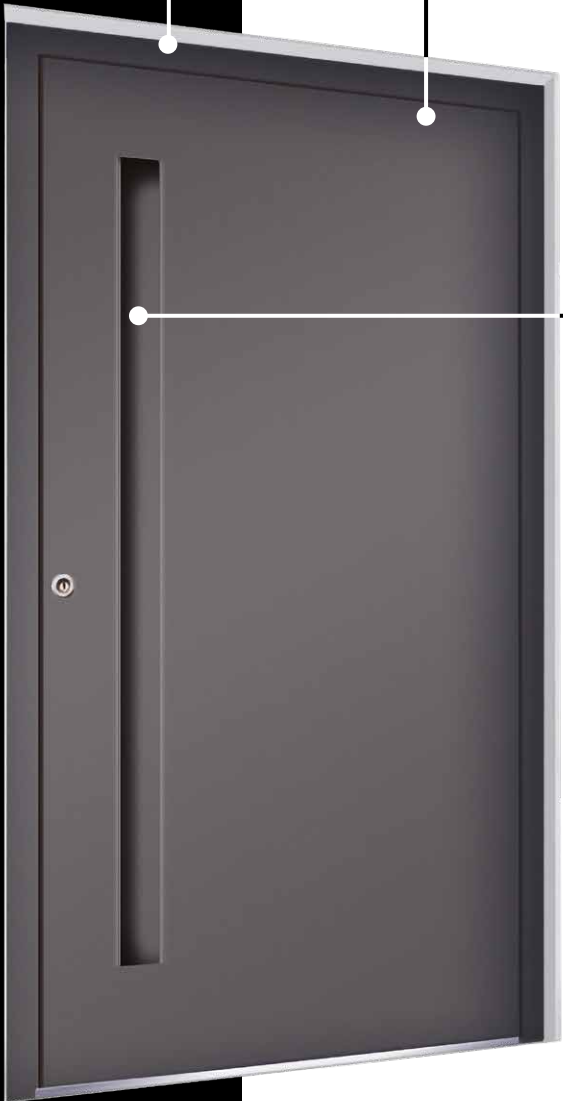

INTERIOR HANDLE

From a renowned and certified brand with exceptional durability and functionality standards.

MODERN TECHNOLOGY

A profile with excellent insulation values, ensuring the door's rigidity and contributing to its longevity.

FILLING

Provides high security and outstanding thermal properties. Exterior sheet: 3 mm, interior sheet: 2 mm. The panel is filled with PUR material inside.

STANDARD HANDLE

A convenient and modern solution. Options include a tubular handle, rectangular handle, or recessed handle. Standard tubular handle on the exterior, 1000 mm in length.

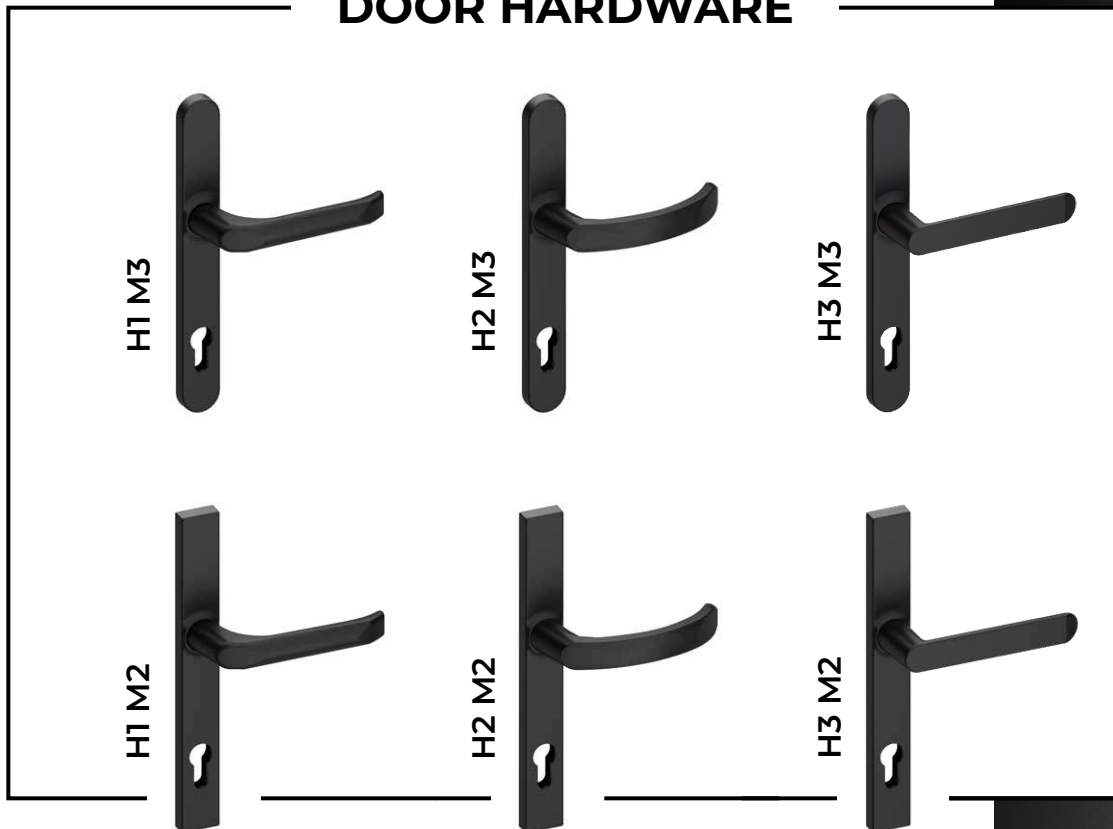

CYLINDER

Burglar-resistant cylinder of class C, while others only offer standard, non-certified solutions. Standard finish: satin.

MULTIPOINT LOCK

3-point mechanism. Ordinary doors usually feature only single-point locks.

QA10

AUTOMATIC MULTIPOINT LOCK

Automatically locking mechanism. Opens in 0.3 seconds – twice as fast as other locks. Provides the customer with easier and more comfortable door operation, with options for remote unlocking and locking, better access control, and convenience in every situation without the need for manual operation.

UPS SYSTEM

The system has its own battery and provides emergency power for several hours.

DAY/NIGHT FUNCTION

Prevents accidental door locking with a mult ipoint mechanism that switches the latch between „open/closed” modes.

ELECTRONIC CYLINDER

A modern lock mechanism operable via code, card, or smartphone app. Each method offers convenience and flexibility. Stores an event history in the app, showing who opened the door and when. Allows remote access granting via the app. Smart energy-saving system. Visual (LED) and sound signals.

Available only in the color shown in the image.

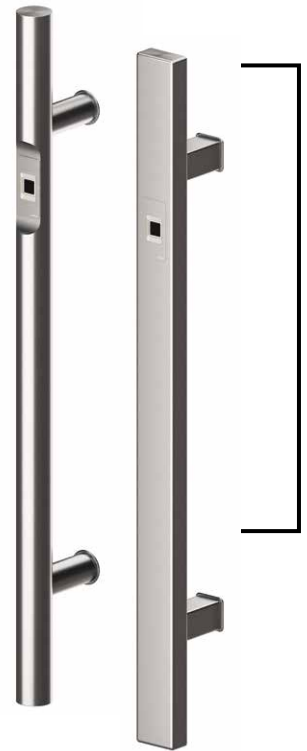

HIDDEN HINGES

Hinges are mounted inside the door frame, making them invisible when the door is closed. This creates a smooth, aesthetically pleasing door surface. Provides extra protection against potential burglars. Allows the door to open up to 180 degrees, enhancing the functionality of the passage.

FINGERPRINT SCANNER

Maximum security – no issues with stolen or lost keys! Superior protection against unauthorized access with RF sensor technology to detect a live finger. 1,000 times safer than a four-digit code. The fingerprint scanner integrates with smart home software. Exceptional convenience – being locked out is impossible as you always have your finger with you! Available in the handle or panel.

BUTTON IN HANDLE

Keyless, touchless – open the door without unnecessary complications. The perfect solution for moments of haste.

CYLINDER COLOR

Option to select a black cylinder instead of satin. An important customization feature that allows the door's aesthetics to match the interior or exterior of the building.
